The New Frontier of Spatial Intelligence

Delivering real-time decision advantage for the world's most important missions.

Our Mission

Vantor delivers unparalleled insights of Earth and space

Giving you the power to understand what's happening now and predict what's coming next.

Our Advantage

Delivering real-time decision superiority for mission-critical impact for a distinct advantage

Fusing software, AI and geospatial data to deliver a new level of automation and intelligence

Deploying advanced software-first solutions that redefine how we power your mission

Our Platform

Our Industries

Powering the world's toughest missions

Defense & Intelligence

Our Solutions

Delivering closed-loop intelligence at tactical speed

• This is an optional Label

Precision in every direction

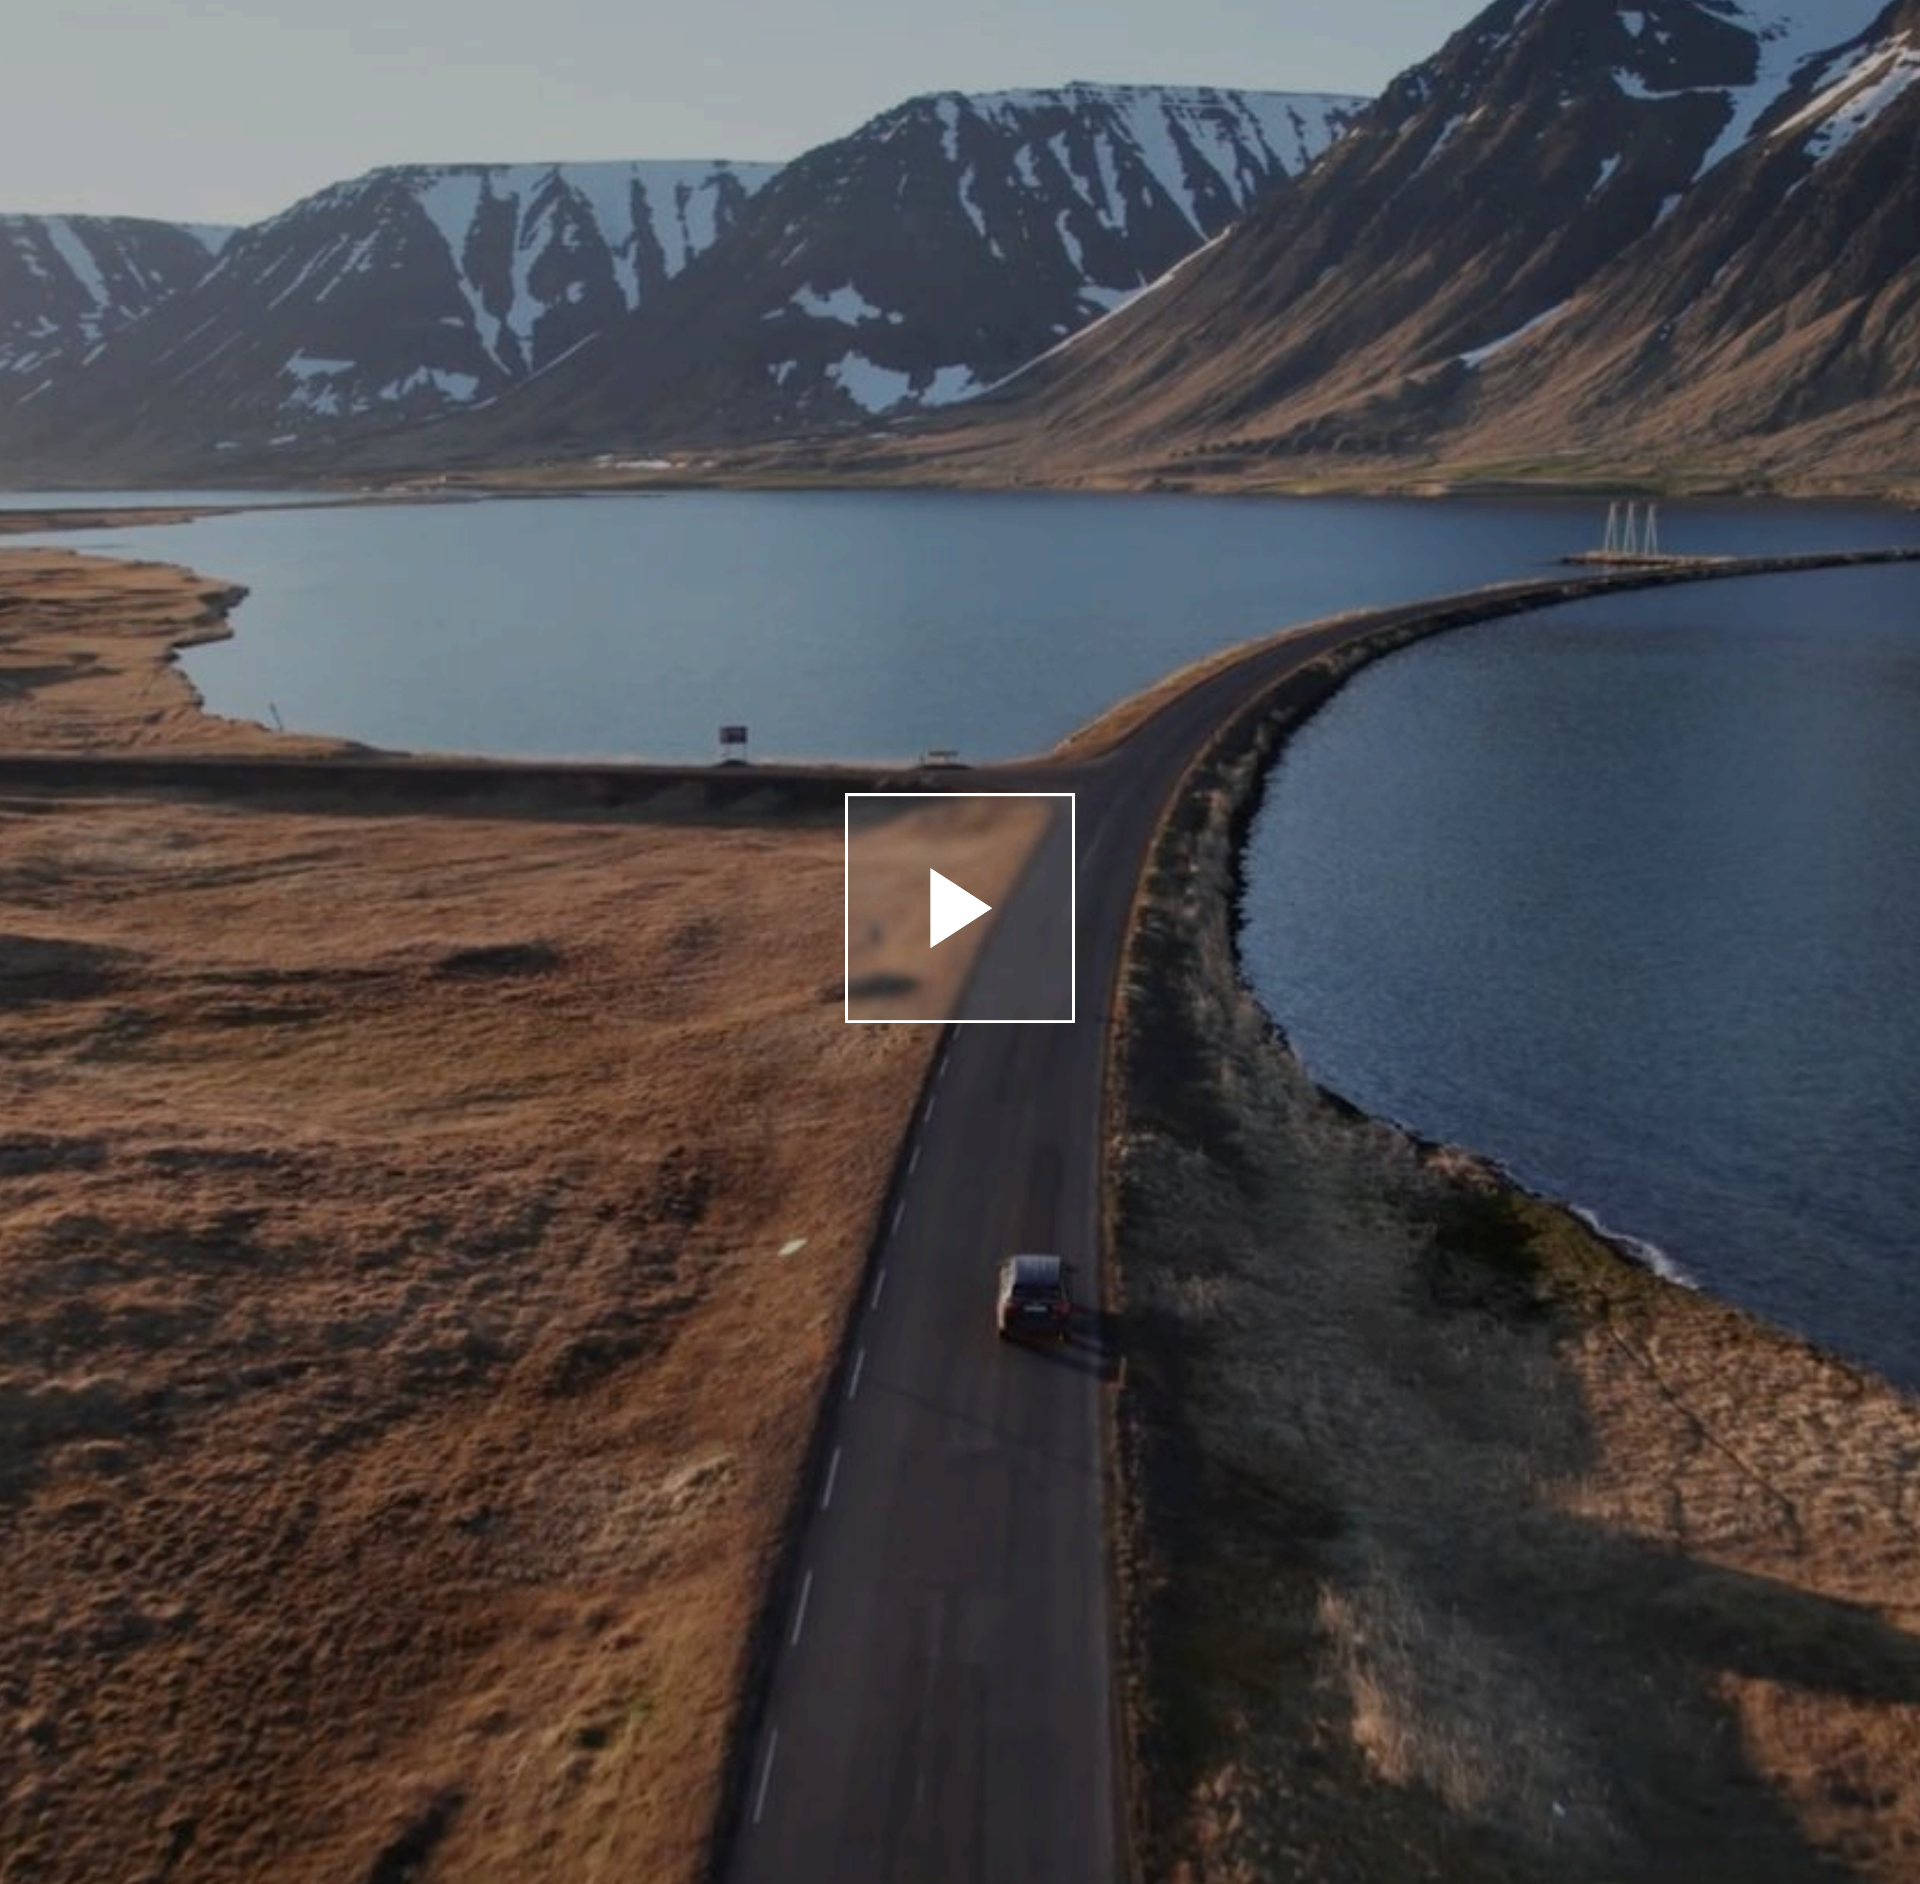

Resolution, accuracy and frequency required for reliable maps, at global scale

Optional CTA

You can't use an old map to explore a new world

In today's highly interconnected world, businesses and consumers demand more details from their maps to increase efficiency and provide better user experiences.

• Navigation

Stunning, realistic basemaps for a better experience

Vantor's imagery basemaps provide a stunning, reliable foundation at global scale to support mapping, visualization and analytics.

Hover over the image to see the highest detail.

“

This is a quote block. You can't use an old map to explore a new world, they say.

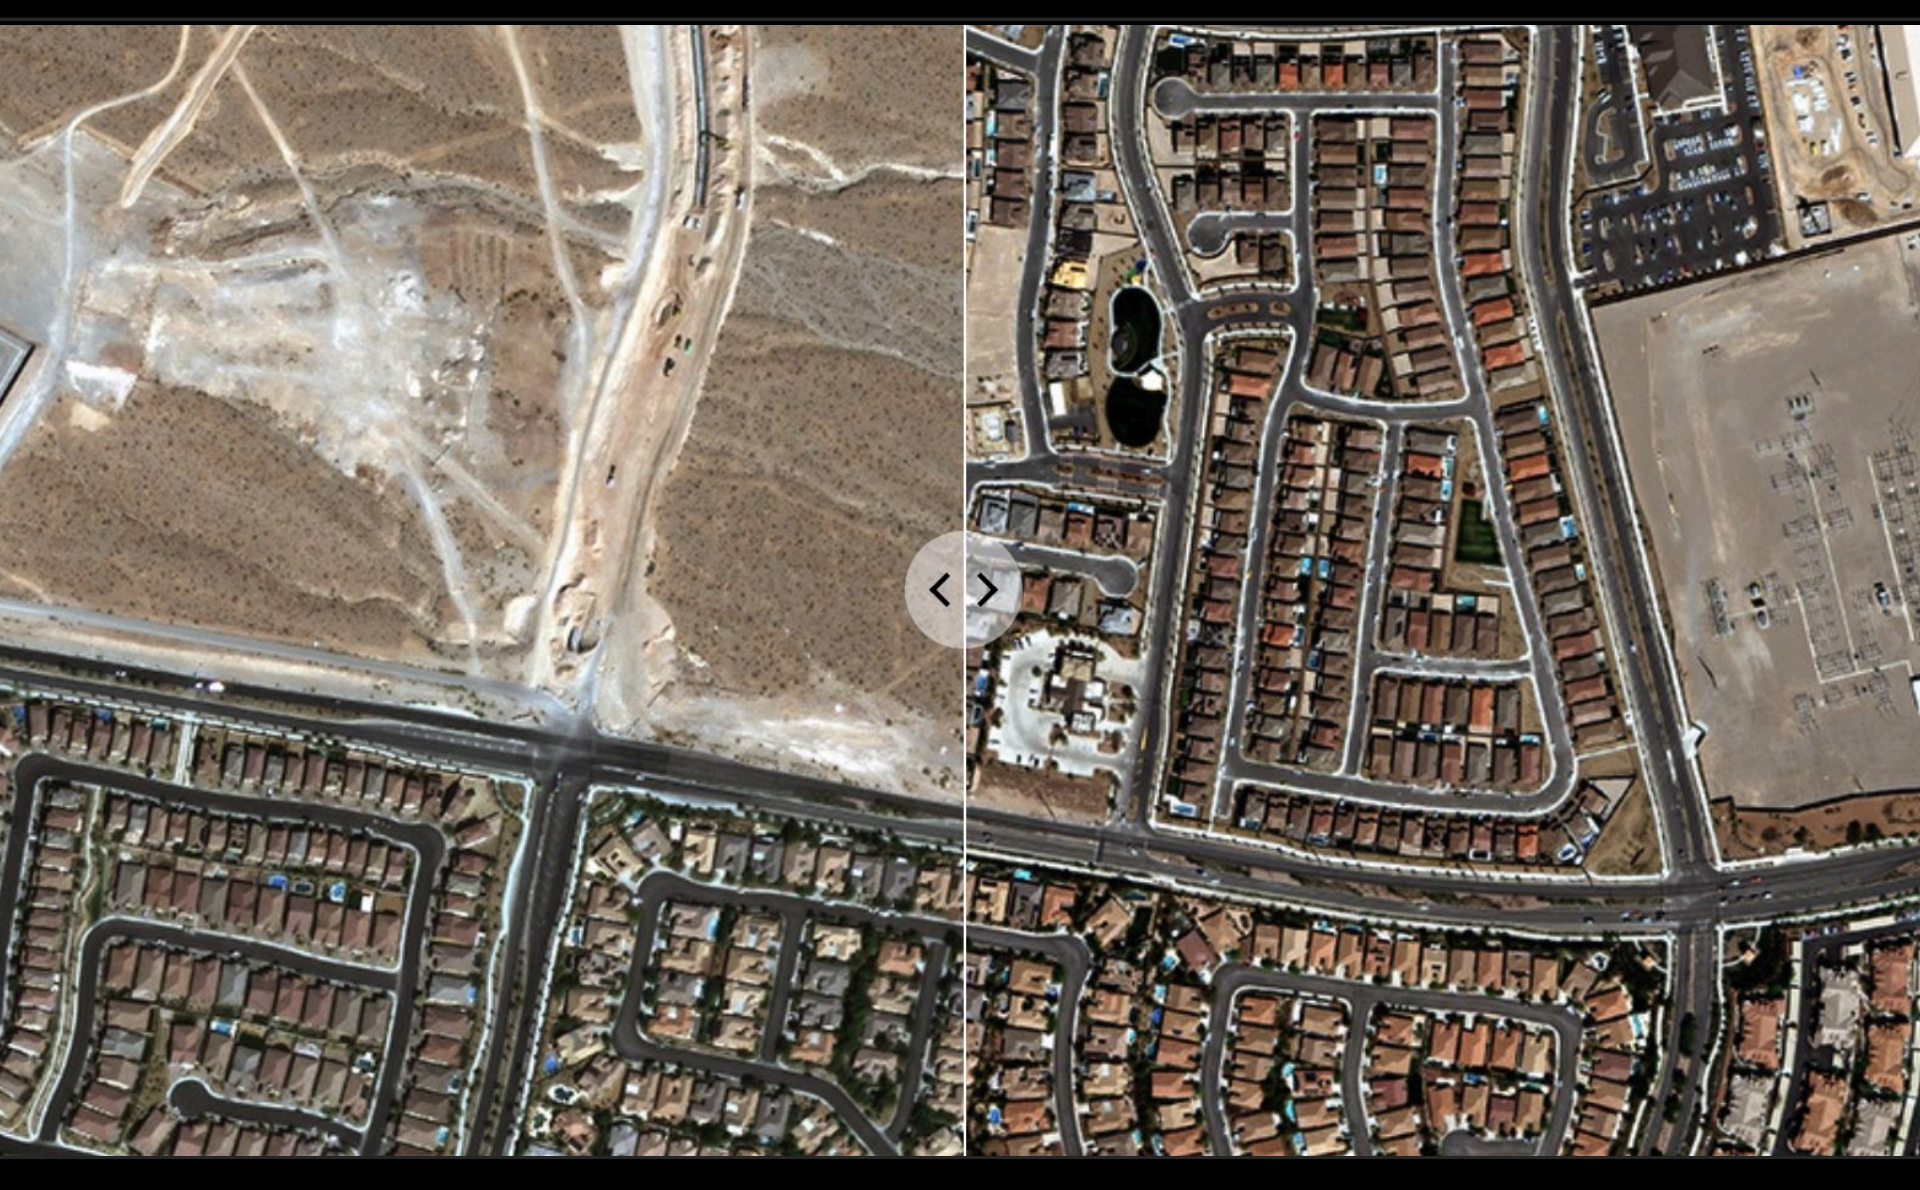

Name, Title and Job Description

tomtom

TomTom + Vantor

TomTom's digital maps use Maxar satellite imagery to add a contextual layer. This visual reference, more like an aerial photo than a map, allows users to safely and efficiently move through their environments.

See How

• Last-Mile Delivery

Currency to identify change and validate map updates

Knowing where change has occurred is key to keeping maps up to date. Whether you identify areas of concern via automated change detection or from information on the ground, knowing exactly what changed is necessary.

here

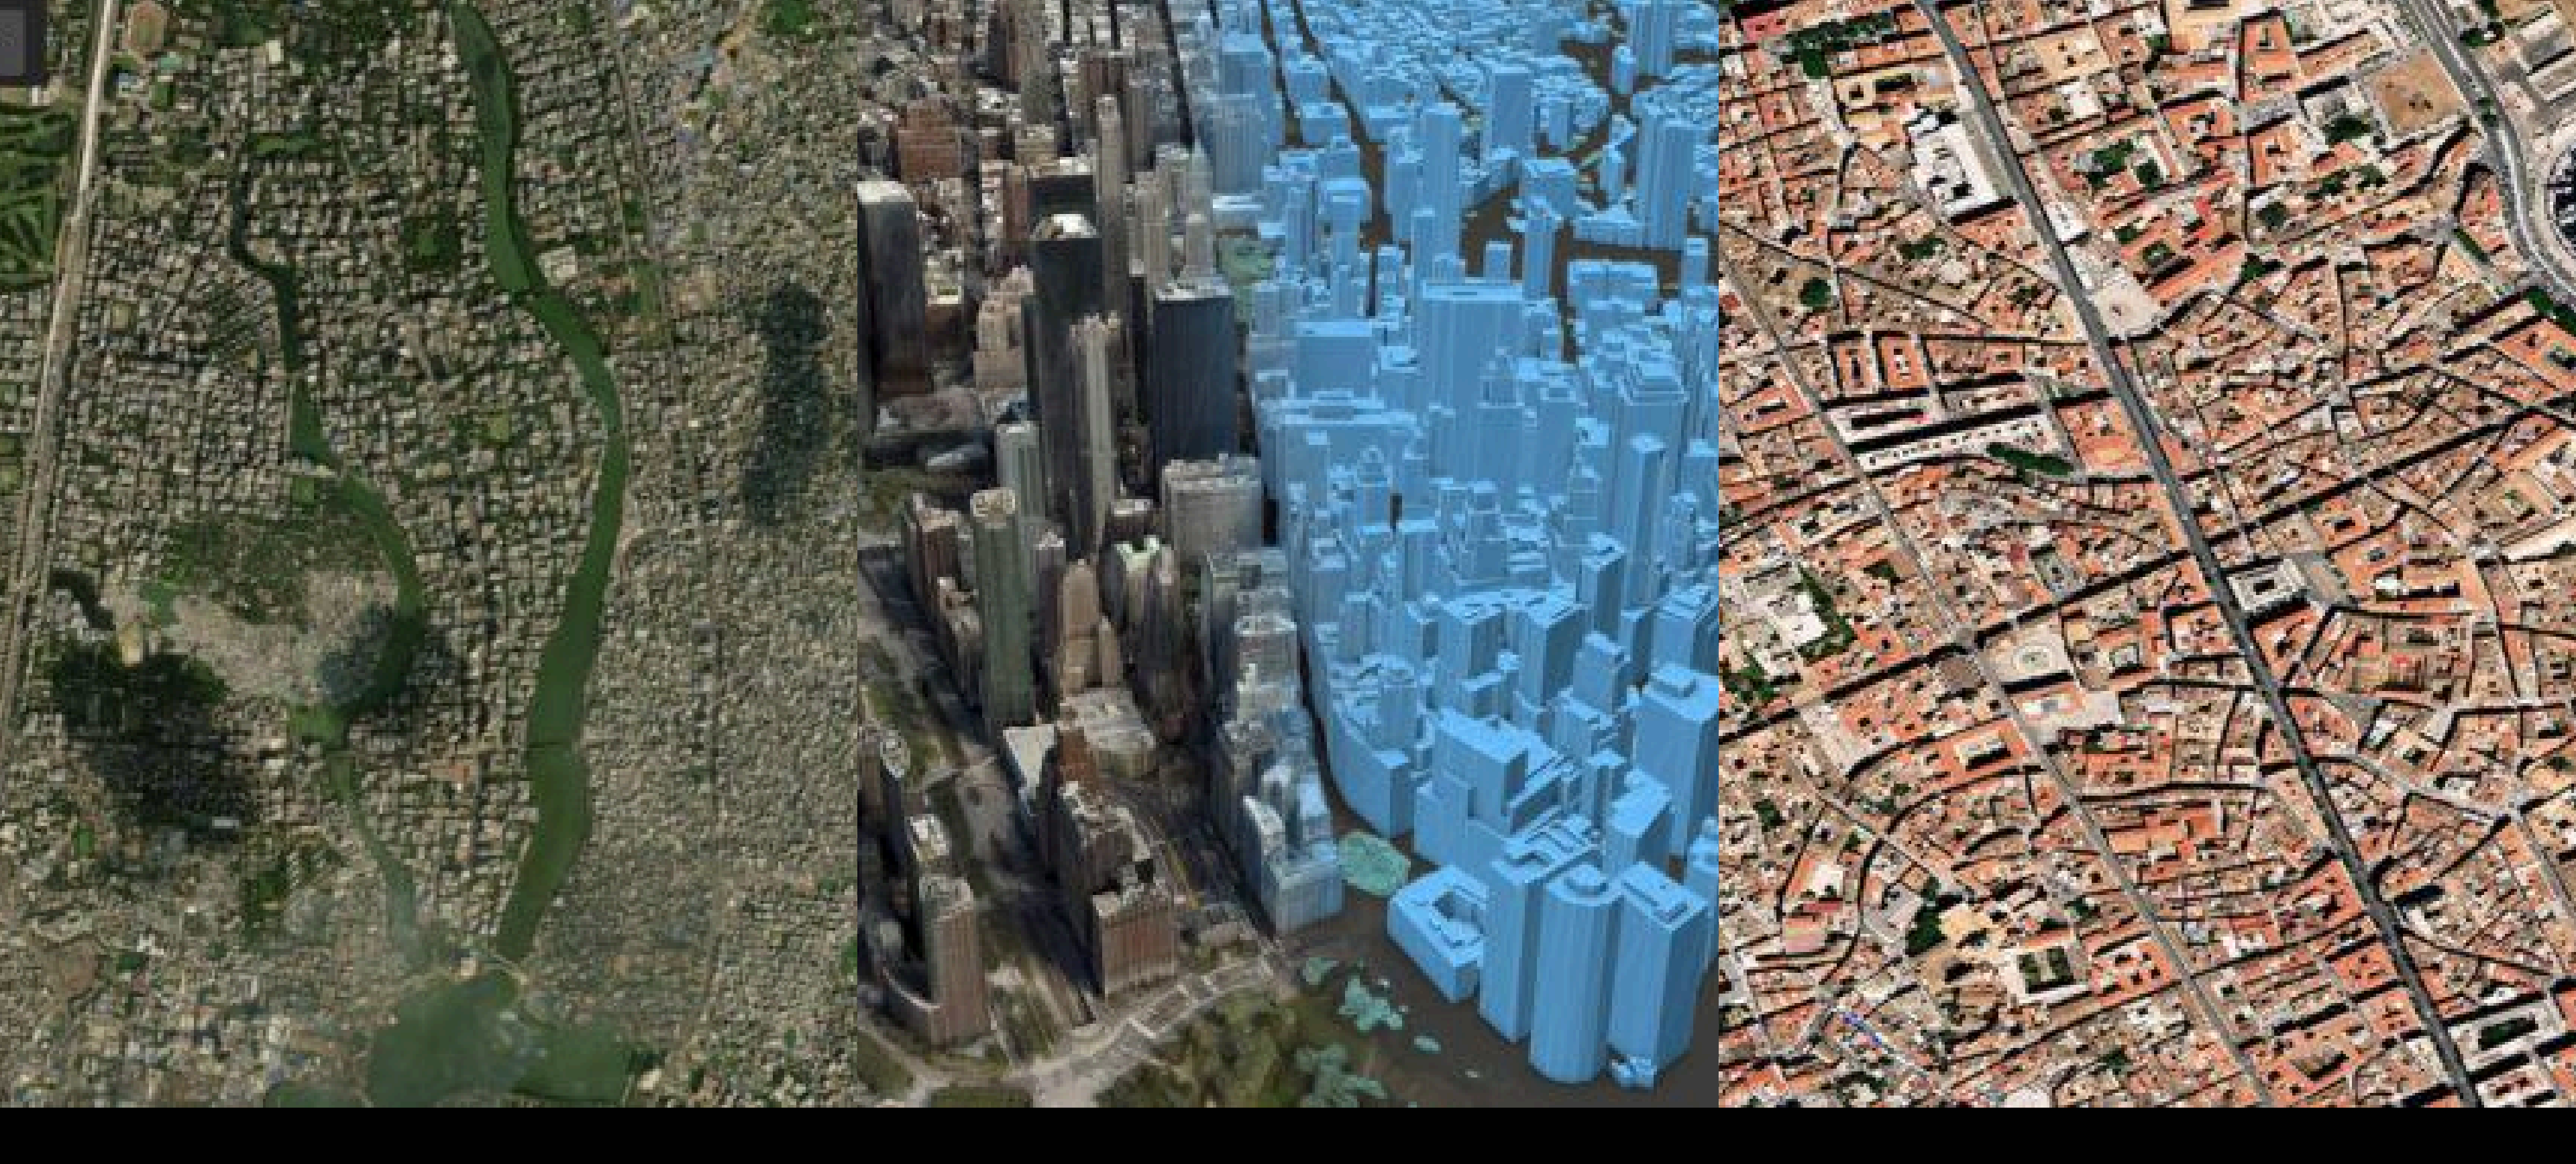

HERE + Vantor

Using Vantor imagery, HERE's Map Creator takes maps enhanced by artificial intelligence (AI) and makes them even better with real-time, real-world feedback from local users and volunteers.

Sentry™

Real-time monitoring for energy security, efficiency and sustainability.

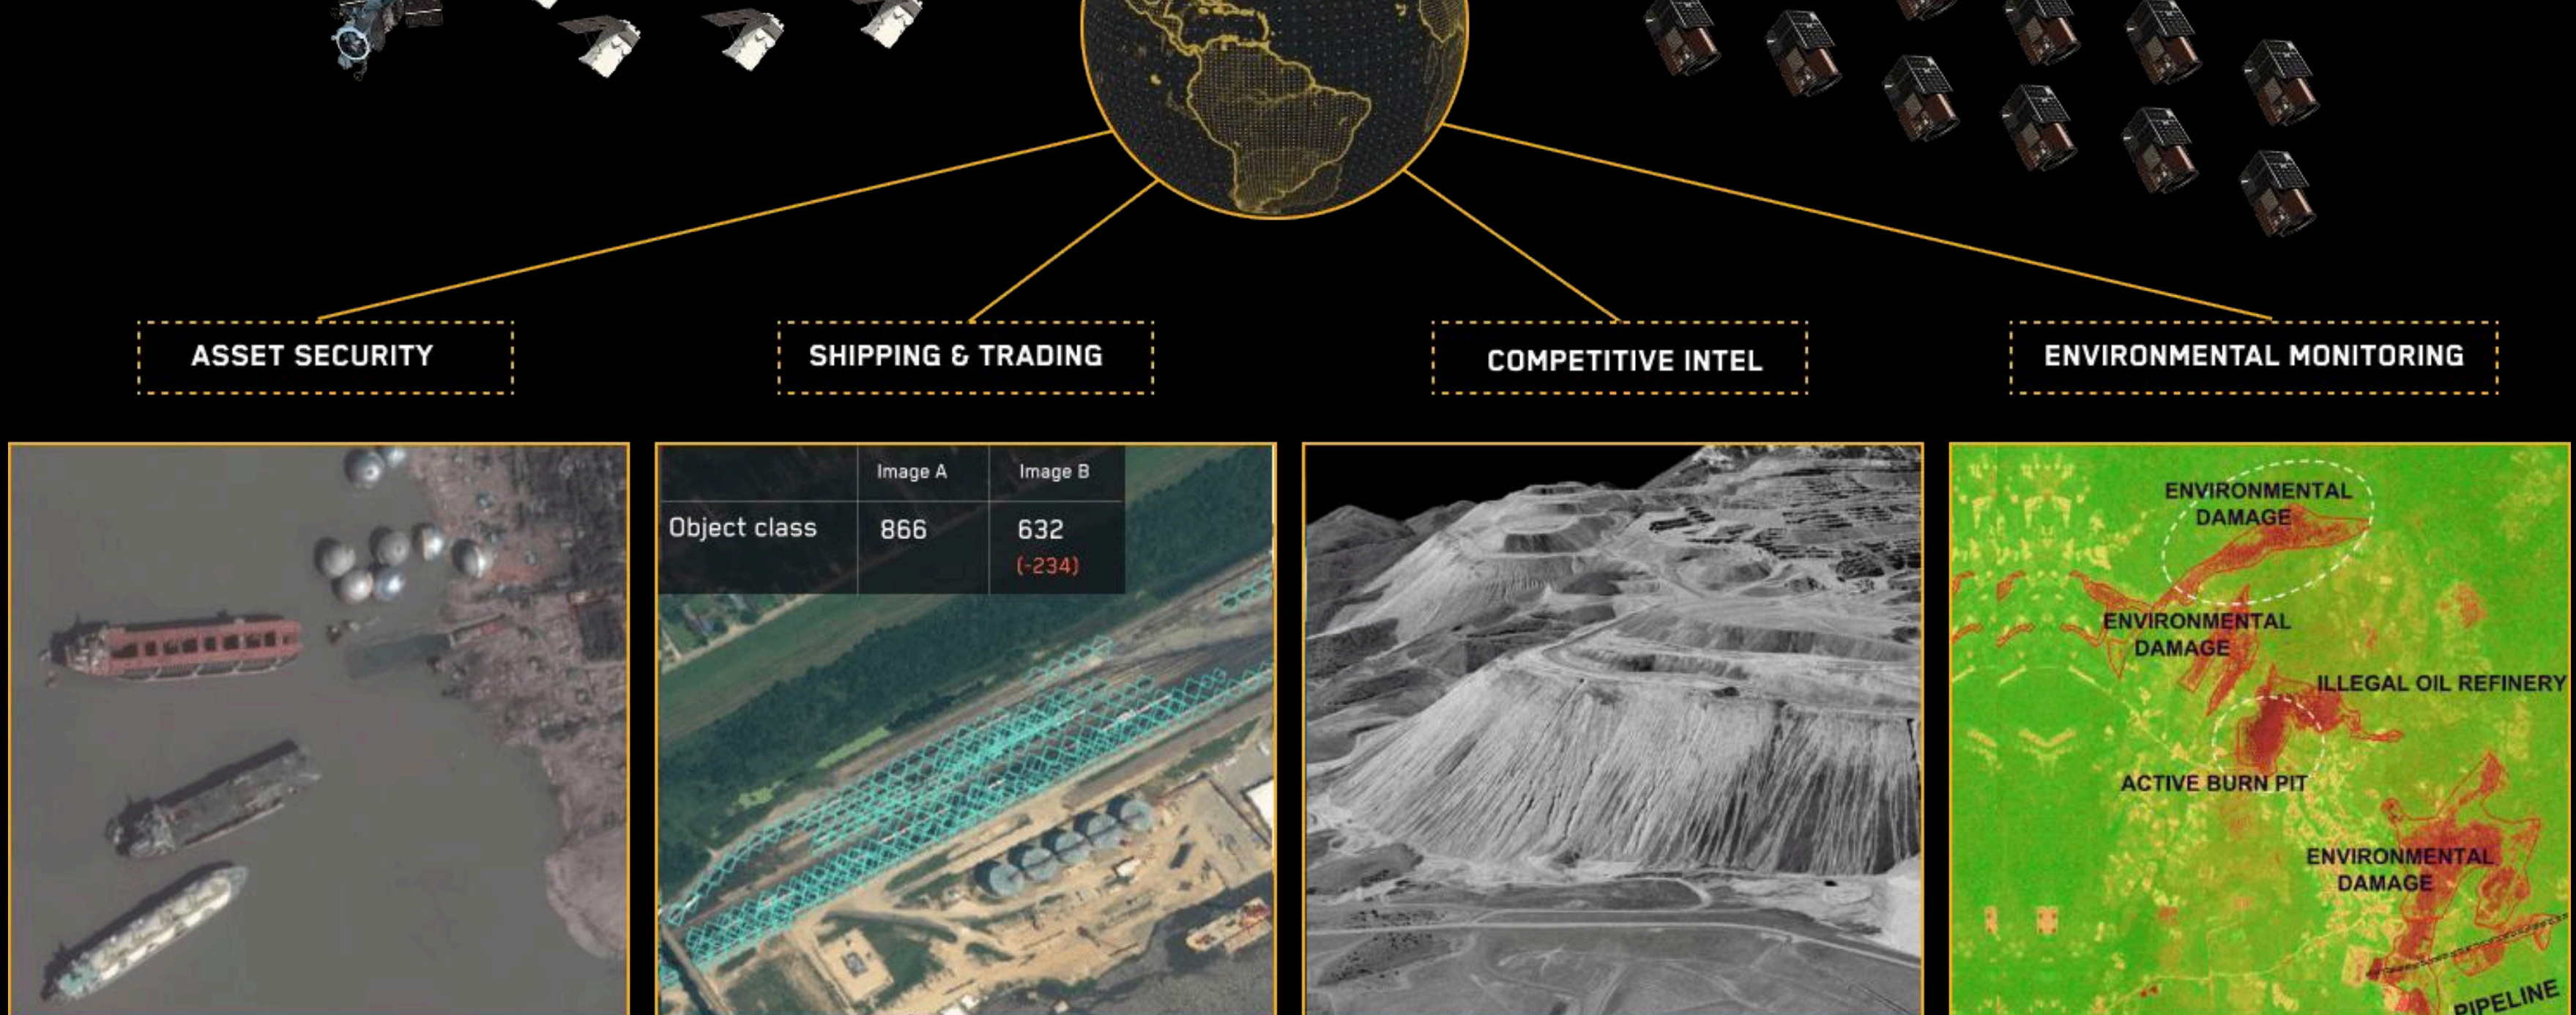

Optional CTA

Automatically monitor onshore and offshore energy assets with geospatial insights

Maxar's innovative site monitoring solution, Sentry, harnesses the power of our virtual satellite constellation and advanced analytics to deliver unparalleled risk and situational awareness.

How It Works

Vantor Constellation + Virtual Constellation

Our Advantage

Nisl rutrum augue orci sed euismod

Raptor is a suite of vision-based software products that transform the resilience and reliability of unmanned systems, enabling autonomy at scale across warfighting, humanitarian and commercial operations for customers across the world.

Draws on unique terrain data

Raptor products all draw from Vantor's 90M+ sq km of highly accurate 3D terrain data (3 m SE90 accuracy), which is regularly updated to provide a reliable view of the operational terrain.
